Radio astronomy :

—— Clustering, cosmology and source counts, *R. Hanbury Brown* 35
—— A survey of the background radiation at a frequency of 404 Mc/s, *I. I. K. Pauliny-Toth and J. R. Shakeshaft*... 61
—— The cosmological implications of the recent counts of radio sources, II. An evolutionary model, *W. Davidson* 79
—— Expanding supernova remnants and galactic radio sources, *H. van der Laan* 125
—— A survey of the anticentre region of the Galaxy at 237 Mc/s, *R. D. Davies and C. Hazard* 147
—— A system of digital analysis for radio astronomy using a fully steerable telescope, *C. G. T. Haslam, J. E. Davies and M. I. Large* 169
—— Intense shell sources of radio emission, *H. van der Laan* 179
—— The spectrum of the galactic radio emission, I. Observations of low resolving power, *A. J. Turtle, J. F. Pugh, S. Kenderdine and I. I. K. Pauliny-Toth* 297
—— The method of lunar occultations and its application to a survey of the radio sources 3C 212, *C. Hazard* 343
—— A radio interferometer for use with very long baselines, *O. Elgaroy, D. Morris and B. Rowson* 395
—— A new feature of the radio sky, *M. I. Large, M. J. S. Quigley and C. G. T. Haslam* ... 405
—— Observations of 384 radio sources at a frequency of 158 Mc/s with a long baseline interferometer, *L. R. Allen, B. Anderson, R. G. Conway, H. P. Palmer, V. C. Reddish and B. Rowson* 477
—— A survey of galactic radiation at 178 Mc/s, *A. J. Turtle and J. E. Baldwin* 459
Reddish, V. C., L. R. Allen, B. Anderson, R. G. Conway, H. P. Palmer, B. Rowson and, Observations of 384 radio sources at a frequency of 158 Mc/s with a long baseline interferometer 477
Reid, J. H., M. A. Ellison, Susan M. P. McKenna and, Cosmic ray flares associated with the 1961 July event 263
Rowson, B., O. Elgaroy, D. Morris and, A radio interferometer for use with very long baselines 395
Rowson, B., L. R. Allen, B. Anderson, R. G. Conway, H. P. Palmer, V. C. Reddish and, Observations of 384 radio sources at a frequency of 158 Mc/s with a long baseline interferometer 477
Shakeshaft, J. R., I. I. K. Pauliny-Toth and, A survey of the background radiation at a frequency of 404 Mc/s 61

Spectroscopy and spectrophotometry :

—— Asymmetry of solar line profiles, *L. A. Higgs* 51
—— Evershed-type lines of the solar limb, *A. B. Hart* 239
—— The infra-red spectrum of Eta Carinae, *A. D. Thackeray* 251
—— The nightglow spectrum, I. λλ 3700–4650 A, *M. F. Ingham* 505
—— The nightglow spectrum, II. Hα radiation in the night sky, *M. F. Ingham* 523

PAGE

Stars, magnitudes of :

—— *U, B, V* photometry in and near the Magellanic Clouds, *A. J. Wesselink* 359
—— Integrated magnitudes and colours of young associations in the Large Magellanic Cloud, *B. J. Bok and P. F. Bok* 435
—— Photoelectric measures of polarization in the halo around η Carinae, *A. J. Wesselink*... 501

Stars, motions of : Stellar dynamics :

—— Stellar dynamics. Only isolating integrals should be used in Jeans' theorem, *D. Lynden-Bell* 1
—— Stellar dynamics. Potentials with isolating integrals, *D. Lynden-Bell* 95
—— The Scorpio-Centaurus Association, III. Radial velocities of 70 additional stars, *W. Buscombe* 189
—— The Scorpio-Centaurus Association, IV. Interstellar absorption lines in the Southern Milky Way, *W. Buscombe and P. Morris Kennedy* 195

Stellar groups, clusters, nebulae (galactic), Milky Way :

—— The Scorpio-Centaurus Association, III. Radial velocities of 70 additional stars, *W. Buscombe* 189
—— The Scorpio-Centaurus Association, IV. Interstellar absorption lines in the Southern Milky Way, *W. Buscombe and P. Morris Kennedy* 195
—— NGC 1783, A cluster in the Large Magellanic Cloud, *S. C. B. Gascoigne* 201
—— The infra-red spectrum of Eta Carinae, *A. D. Thackeray* 251
—— The cluster NGC 6067, *A. D. Thackeray, A. J. Wesselink and G. A. Harding* ... 445
—— Photoelectric measures of polarization in the halo around η Carinae, *A. J. Wesselink* ... 501

Summaries of Royal Observatory publications :

—— Publications of the Royal Greenwich and Cape Observatories 533

Sun :

—— Medium-strong line theory of solar atmospheric abundances : oxygen abundance, *D. J. Faulkner and D. Mugglestone*... 11
—— Asymmetry of solar line profiles, *L. A. Higgs* 51
—— Evershed-type lines at the solar limb, *A. B. Hart* 239
—— Cosmic ray flares associated with the 1961 July event, *M. A. Ellison, Susan M. P. McKenna and J. H. Reid* 263
—— Dynamical consequences of the fact that the Sun's rotation varies with latitude, *J. L. Synge* 275
Synge, J. L., Dynamical consequences of the fact that the Sun's rotation varies with latitude 275

Thackeray, A. D., The infra-red spectrum of Eta Carinae 251
Thackeray, A. D., A. J. Wesselink and G. A. Harding, The cluster NGC 6067 445
